

LEKHA — customer journey from discovery to daily use.

CHANNEL · LINE MESSENGER + WEB
SURFACE · AI EXECUTIVE ASSISTANT
OWNER · LEKHA ADMIN TEAM

ABOUT THIS MAP

Two entry channels (LINE chat & web) converge on a single monthly-subscription checkout. Before paying, the user signs in with LINE — capturing their ID automatically. No manual entry, no plan picker, no free trial.

DECISION POINTS

Three gates govern the flow: **entry channel**, **payment outcome**, and **onboarding mode**. A fourth gate during active use routes the user to human support when AI help is insufficient. Manual linking has been removed — LINE login handles identity end-to-end.

CONFIGURATION SURFACES

Post-onboarding, Google services are connected (calendar · drive · gmail). The dashboard then fans into **daily-brief topics** (7 editorial verticals) and **productivity tools** (to-do, reminders, calendar, email assistant, Drive). Daily usage runs a memory box that auto-compacts every 10 messages.
